Registered Users can change their Profile information at any time.

When Users register to use the Services, HeartOut collects User submitted personal information such as name, mailing address, email address, telephone number. HeartOut uses that information to authenticate Users and to send notifications to Users relating to, without limitation, the Services and other opportunities.

As is standard practice, HeartOut also logs non-PII, including IP address, profile information, aggregate User data, and browser type, from your use of the Services. This data is used to improve the Services, to analyze trends, to administer the Services, to track Users' movements around the Services and to gather demographic information about our User base as a whole. User IP addresses are recorded for security and monitoring purposes and to facilitate User interaction in the HeartOut community.

HeartOut may also use a User's email address to send updates, a newsletter or news regarding the Services. HeartOut may send email messages, which use a "click-through URL" linked to content on the Services. When a User clicks one of these URLs, they pass through our web server before arriving at the destination web page. HeartOut tracks this click-through data to help determine interest in particular topics and measure the effectiveness of our customer communications. If you prefer not to be tracked simply avoid clicking text or graphic links in the email.

From time to time, HeartOut or a partner may sponsor an opportunity, promotion, or contest through the Services. Users may be asked to provide personal information including name, email address or home address or to answer questions in order to participate. HeartOut may transfer personal information to certain advertising partners that you have explicitly requested to receive information from. It will be clear at the point of collection who is collecting the personal information and whose privacy statement will apply.

HeartOut may also collect information for market research purposes to gain a better understanding of our customers and thus provide more valuable service. HeartOut also collects information regarding customer activities on our Services, and on related websites. This helps us to determine how best to provide useful information to customers and to understand which parts of our Services are of most interest to them.

Our User accounts are secured by user-created passwords. We take precautions to ensure that account information is kept private. We use reasonable measures such as encryption to protect

private information that is stored within our database against loss, theft, and misuse, as well as unauthorized access, disclosure, alteration, and destruction, and we restrict access to such private information to those employees who need access to perform their job functions, such as our customer service personnel and technical staff. Among these measures, when you enter sensitive information on our order forms, we encrypt the transmission of that information using secure socket layer (SSL) technology, which creates an encrypted connection between you and our systems. Once we collect your information, it is stored encrypted on restricted-access computers that are not directly accessible via the Internet. Please note that no method of electronic transmission or storage is 100% secure, however, and we cannot guarantee the security of User account information. Unauthorized entry or use, hardware or software failure, and other factors may compromise the security of Member information at any time. Websites, apps and other services send this data to a child's browser when he or she first requests a web page and then stores the data on the child's computer so the website can access the information when the child makes subsequent requests for pages from that service. We may use the information we collect from children for these additional purposes:

To allow service providers to assist us in providing and managing the Services. Company may make a child's information available to certain third-party service providers, such as contractors or agents who help us manage or provide the Services. These service providers only use the information from children for our internal purposes, consistent with this paragraph 10.

To protect the rights of Company and others. There may be instances when Company may disclose a child's information, including situations where Company has a good faith belief that such disclosure is necessary in order to: (i) protect, enforce, or defend the legal rights, privacy, safety, or property of Company, our Company affiliates or their employees, agents and contractors (including enforcement of our agreements and our terms of use); (ii) protect the safety, privacy, and security of Users of the Services or members of the public; (iii) protect against fraud

or for risk management purposes; (iv) comply with the law or legal process; or (v) respond to requests from public and government authorities.

Company uses commercially reasonable administrative, technical, personnel and physical measures to safeguard information in its possession against loss, theft and unauthorized use, disclosure or modification. Please be aware that, despite our best efforts, no security measures are perfect or impenetrable.
